

# Chandrayaan-3 Mission Profile - Page 1

## Section 1: Technical Details & Analysis

Mission Overview: Chandrayaan-3 is a follow-on mission to Chandrayaan-2, designed to demonstrate end-to-end capabilities in safe lunar landing and roving on the lunar surface.

Launch Date: July 14, 2023

Landing Date: August 23, 2023

Landing Site: Near the lunar South Pole

Objectives: Safe and soft landing, Rover roving, and in-situ scientific experiments.

Lander Payloads: ChaSTE, ILSA, LP, LRA.

Rover Payloads: LIBS, APXS.

[illegible]

section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters.

## Section 3: Technical Details & Analysis

Mission Overview: Chandrayaan-3 is a follow-on mission to Chandrayaan-2, designed to demonstrate end-to-end capabilities in safe lunar landing and roving on the lunar surface.

Launch Date: July 14, 2023

Landing Date: August 23, 2023

Landing Site: Near the lunar South Pole

Objectives: Safe and soft landing, Rover roving, and in-situ scientific experiments.

Lander Payloads: ChaSTE, ILSA, LP, LRA.

Rover Payloads: LIBS, APXS.

[illegible]

section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters.

## Chandrayaan-3 Mission Profile - Page 4

## Section 4: Technical Details & Analysis

Mission Overview: Chandrayaan-3 is a follow-on mission to Chandrayaan-2, designed to demonstrate end-to-end capabilities in safe lunar landing and roving on the lunar surface.

Launch Date: July 14, 2023

Landing Date: August 23, 2023

Landing Site: Near the lunar South Pole

Objectives: Safe and soft landing, Rover roving, and in-situ scientific experiments.

Lander Payloads: ChaSTE, ILSA, LP, LRA.

Rover Payloads: LIBS, APXS.

[illegible]

section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters.

## Chandrayaan-3 Mission Profile - Page 5

## Section 5: Technical Details & Analysis

Mission Overview: Chandrayaan-3 is a follow-on mission to Chandrayaan-2, designed to demonstrate end-to-end capabilities in safe lunar landing and roving on the lunar surface.

Launch Date: July 14, 2023

Landing Date: August 23, 2023

Landing Site: Near the lunar South Pole

Objectives: Safe and soft landing, Rover roving, and in-situ scientific experiments.

Lander Payloads: ChaSTE, ILSA, LP, LRA.

Rover Payloads: LIBS, APXS.

[illegible]

section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters.

## Section 6: Technical Details & Analysis

Mission Overview: Chandrayaan-3 is a follow-on mission to Chandrayaan-2, designed to demonstrate end-to-end capabilities in safe lunar landing and roving on the lunar surface.

Launch Date: July 14, 2023

Landing Date: August 23, 2023

Landing Site: Near the lunar South Pole

Objectives: Safe and soft landing, Rover roving, and in-situ scientific experiments.

Lander Payloads: ChaSTE, ILSA, LP, LRA.

Rover Payloads: LIBS, APXS.

[illegible]

section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters.

## Chandrayaan-3 Mission Profile - Page 7

## Section 7: Technical Details & Analysis

Mission Overview: Chandrayaan-3 is a follow-on mission to Chandrayaan-2, designed to demonstrate end-to-end capabilities in safe lunar landing and roving on the lunar surface.

Launch Date: July 14, 2023

Landing Date: August 23, 2023

Landing Site: Near the lunar South Pole

Objectives: Safe and soft landing, Rover roving, and in-situ scientific experiments.

Lander Payloads: ChaSTE, ILSA, LP, LRA.

Rover Payloads: LIBS, APXS.

[illegible]

section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters.

## Section 12: Technical Details & Analysis

Mission Overview: Chandrayaan-3 is a follow-on mission to Chandrayaan-2, designed to demonstrate end-to-end capabilities in safe lunar landing and roving on the lunar surface.

Launch Date: July 14, 2023

Landing Date: August 23, 2023

Landing Site: Near the lunar South Pole

Objectives: Safe and soft landing, Rover roving, and in-situ scientific experiments.

Lander Payloads: ChaSTE, ILSA, LP, LRA.

Rover Payloads: LIBS, APXS.

[illegible]

section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters.

## Chandrayaan-3 Mission Profile - Page 13

## Section 13: Technical Details & Analysis

Mission Overview: Chandrayaan-3 is a follow-on mission to Chandrayaan-2, designed to demonstrate end-to-end capabilities in safe lunar landing and roving on the lunar surface.

Launch Date: July 14, 2023

Landing Date: August 23, 2023

Landing Site: Near the lunar South Pole

Objectives: Safe and soft landing, Rover roving, and in-situ scientific experiments.

Lander Payloads: ChaSTE, ILSA, LP, LRA.

Rover Payloads: LIBS, APXS.

[illegible]

section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters.

## Chandrayaan-3 Mission Profile - Page 14

## Section 14: Technical Details & Analysis

Mission Overview: Chandrayaan-3 is a follow-on mission to Chandrayaan-2, designed to demonstrate end-to-end capabilities in safe lunar landing and roving on the lunar surface.

Launch Date: July 14, 2023

Landing Date: August 23, 2023

Landing Site: Near the lunar South Pole

Objectives: Safe and soft landing, Rover roving, and in-situ scientific experiments.

Lander Payloads: ChaSTE, ILSA, LP, LRA.

Rover Payloads: LIBS, APXS.

[illegible]

section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters.

## Chandrayaan-3 Mission Profile - Page 15

## Section 15: Technical Details & Analysis

Mission Overview: Chandrayaan-3 is a follow-on mission to Chandrayaan-2, designed to demonstrate end-to-end capabilities in safe lunar landing and roving on the lunar surface.

Launch Date: July 14, 2023

Landing Date: August 23, 2023

Landing Site: Near the lunar South Pole

Objectives: Safe and soft landing, Rover roving, and in-situ scientific experiments.

Lander Payloads: ChaSTE, ILSA, LP, LRA.

Rover Payloads: LIBS, APXS.

[illegible]

section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters. This section contains detailed telemetry data, structural analysis, and mission parameters.
